

PAMELA MENDOZA PANIAGUA

+56 9 6801 5050 | PAME.MENDOZA14.99@GMAIL.COM | [GITHUB](#) | [LINKEDIN](#)

SANTIAGO, CHILE

EDUCATION

Universidad de Chile, Santiago

Student | *Computer Science Engineering*

SKILLS

Programming: Python | C | C++ | Scala | SQL | JavaScript

Software: Git / GitHub | Linux (Debian), WSL | Visual Studio Code | Power BI

Languages: English (B2) | Spanish (native)

EXPERIENCE

Teaching Assistant | *Introduction to Programming*

August 2026 - Present

- Deliver short lessons on Python programming concepts and techniques, reinforcing topics covered in lectures.
- Guide students through weekly programming exercises assessed in class.
- Grade programming exercises, written exams and programming assignments, assessing the correct application of programming concepts and techniques and compliance with requirements.

Teaching Assistant | *Computing Tools for Engineering and Science*

March 2026 - July 2026

- Assisted with hands-on lab sessions focused on computational tools such as Excel and Python, supporting students with debugging, troubleshooting, and software usage.
- Answered students' technical and administrative questions, maintaining effective communication.
- Graded weekly assignments and lab exercises, evaluating solutions with a focus on accuracy and adherence to requirements.

Development and Automation Intern | *Enel Generación S.A.*

January 2025 - March 2025

- Developed a Python application with a graphical interface to automate the processing of multiple Excel files.
- Implemented data transformation and consolidation logic to generate a single output file.
- Contributed to the optimization of manual processes, reducing processing time and improving operational efficiency.

PROJECTS

Personal projects in IoT and embedded systems (Arduino) |

January 2026 - Present

- Exploring microcontroller programming using Arduino.
- Developing personal projects focused on basic hardware control and IoT.
- Programming in C/C++ for device control.

Freelance Tech Support (occasionally) |

August 2020 - Present

- Provide occasional independent technical support, primarily focused on computer configuration and optimization.
- Troubleshoot software and operating system issues in personal or remote environments.
- Assemble and perform basic maintenance on desktop computers and laptops as needed.
- Reinstall operating systems and configure drivers on personal and third-party devices.
